

I oppose the weakening of Indiana's Telephone Privacy Law. Since my phone number has been registered in the database, I have received significantly fewer unsolicited phone calls. This means no junk calls on my answering machine, no calls during dinner for credit cards I do not want and no calls from people I do not know. If the banks have an offer they think I really will want to know about, they can spend the money to mail me the information where I can look at it at my leisure. Please do not allow these business interests to further invade my privacy by weakening the Indiana Telephone Privacy Law.
